

PowerPoint Course

Robert Stetson

PowerPoint is a program that you can use to arrange a list of photos or slides to be displayed one at a time in a specified order. You do not have to be an expert, or even skillful in using PowerPoint to make a PowerPoint presentation. PowerPoint is one of those programs that can be very powerful and yet meet your simplest needs. PowerPoint also has many special complex functions and capabilities that you don't have to understand or even know about. We will make a slide or two and put up some pictures with a simple menu. You will be amazed at the result and just how easy it is to do that. The journey begins with a single step. Let's begin by making a slide show depicting a fictitious family. The pertinent photos are grouped in a file folder. You will not have to know how to take photos to complete this course. You will be told how to obtain the photos, slides and pages in this book.
