

Power System Infrastructure : CRIS Conference on Interdependencies and Applications

Edited by Virgilio A. Centeno

This book is a compilation of work from Europe and the United States that covers many important topics. One full section is devoted to the modeling of interdependencies in critical infrastructures, which is a new area of research for academia and national security agencies. It also includes a section on the security assessment of critical infrastructures, another on the effect of natural disasters on critical infrastructures, as well as other multi-area research topics.
